

## WHICHAWAY ACTIVITIES

Whichaway is situated at the base of a 60m / 200ft ice fall on the Schirmacher Oasis, where the glaciers of the Antarctic Ice Sheet meet the sea ice of the Novolazarevskaya Nivl Ice Shelf. Surrounded by stunning rock and ice formations, guests are in the perfect location for exploration and adventure – or simply to relax and enjoy the peaceful solitude of the Great White Continent.

Our fully-qualified UIAGM guides lead activities at Whichaway at a pace that suits our guests. Whether it's ice-climbing and exploring the crystal caves, yoga or relaxing in the library with a book, Whichaway is an inspiring escape from the hubbub of everyday life.

*\*There is no minimum fitness requirement for our activities; guests always have the final decision on which activities they wish to join.*

### CRYSTAL CAVES

The meltwater flows through tunnels and caves that will defy our guests' imagination.

The ancient ice, created over millennia, has so little air trapped within it that it turns blue – and is a perfect accompaniment to a cocktail!

### ICE TUNNELS

The seasonal meltwater carves a path through the ice waves, forming deep tunnels of iridescent blue ice at the base of the Oasis.

Exploring the tunnels is truly a magical experience.

### NUNATAK

A proud nunatak, a mountain peak protruding out of the ice, offers a stark contrast to the glacier and is an astonishing location to spend a day trekking and abseiling.

ROCK CLIMBING

GLACIER TREKKING

ABSEILING

**ROPE WALK**

On a hike that is as safe as it is spectacular, our guides lead our guests on an easy traverse across a 200ft cliff with an incredible view of the ice waves below.

**BODY & SPIRIT**

Guests will love the stunning views across Whichaway Lake from our yoga pod, followed by a sauna or perhaps a drink on the terrace before dinner..

**ICE CLIMBING**

With the help of Ice Axe and crampons guests can scale walls of ice that have been formed out of the glacier surrounding the Nunatak.

**CHAMPAGNE PICNICS**

Our chefs prepare gourmet picnics for guests to enjoy between the day's activities.

**BLUE RIVERS**

The cascading meltwater of the Antarctic spring flows through the ice waves below Whichaway, creating blue rivers that seem to have jumped straight out of the pages of a storybook.
